

## Lucy Mountford

After leaving The Willows Lucy attended St Peter's High School before continuing her studies at Stoke Sixth Form College. She chose not to attend university but instead progress in her chosen field of work.

She is a Fire Safety Surveyor, working in and around London for a large fire engineering company. This job involves completing fire risk assessments on a variety of buildings as well as inspecting construction sites. Lucy's job is to ensure that buildings meet regulations in order for them to be signed off as safe.

The role is very rewarding, especially when she gets to see the building/project completed and built to suitable fire safety standards. Some of the projects she has worked on include; Harrods, Deutsche Bank, Gatwick Airport and a lot of residential buildings and schools.
