

Our Science Ambassadors play a vital role in promoting and supporting science across our school. They inspire curiosity and wonder, encouraging everyone to explore, ask questions, and think scientifically. These enthusiastic leaders help us stay safe during experiments, share ideas, and celebrate how science connects to our lives and the world around us. By representing science, they ensure it remains exciting, inclusive, and accessible for all. From leading discussions to championing science in everyday life, our ambassadors remind us to think deeper, work collaboratively, and see science as an essential part of who we are and how we learn.
